

## Looped Pointed Bow

Materials needed:

Wire - 18-20 gauge

Clippie of your choice, French clippie is preferred for the stability of the bow

Spray fabric stiffener

White tissue paper or Paper towels

Use a 40" piece of 1.5" ribbon. Take your left tail piece of your ribbon bring it towards you and form a loop like so.

Now take your bow and turn it once counter clockwise so both loops are on the same side facing you.

take your ribbon and pull it up and straight away from you. Take your ribbon and form a loop by bringing that piece of ribbon and turning it towards you to form your loop. Turn your bow one time to the left and you have your three loops, you need to repeat the process until you have the 4 loops.

Clinch your bow in the center and wrap some wire around it a few times, leave some hanging.

Take 6" of 1.5" ribbon, cut your tails on an angel like a V stack it on top of your bow and secure it well by wrapping wire around it a couple of times.

There you have your Looped Pointed Bow! Remember to poof up your loops like I taught you with your tissue paper and spray it with some fabric stiffener!
