

## Madeline FunKY GiRLz BoW!

Measure and cut 2 pieces of 1.5" blue bandana ribbon 18" long

1 piece of 1.5" turquoise ribbon 18" long

2 pieces of 8" - 7/8" blue ribbon

34" of 1.5" turquoise grosgrain ribbon

2 - 5" pieces of turquoise grosgrain ribbon, cut both ends of the ribbon on a V angle

4" piece of blue satin ribbon cut on angle / on both sides

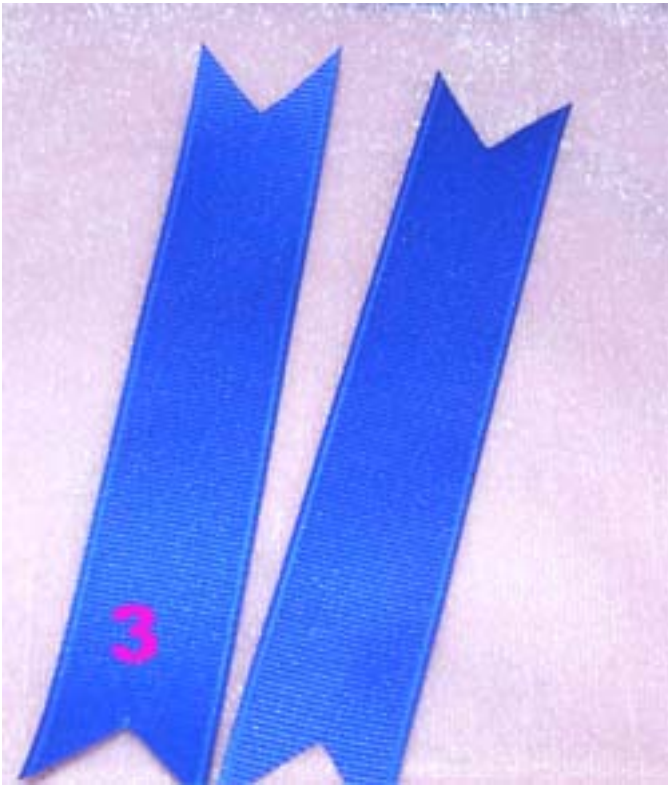

Take a piece of your 18" ribbon fold one piece under then the other, make sure that at least 1/4" of your ribbon is overlapping each other. Wire the bow in the center. Make SURE you do this so that your bows do not come apart. Do this two more times with the other 2 pieces of 18" long ribbon.

Place one of the blue bandana bows down, add the turquoise bow in the center and another blue bow underneath it. Clinch the bows in your hand in the center and wrap your wire around it a few times to make it nice and secure.

Take your two blue grosgrain tails that you cut the ends of the ribbon on an angle like V shape. Place them on a piece of cardboard and spray them with the fabric stiffener.

When dry turn your bow over and wire these two tails next to each other on the back of your bow going in an upward position.

Flip your bow back over. Put this bow aside.

Make a basic pageant bow by taking your 34" - 1.5" ribbon and folding it in half length wise, a little at a time, take your rulers edge and crease your ribbon well on the fold! This is very important for the shape of the ribbon, it's all in the crease! Fold the ribbon and Crease as you go! repeat until you have done that to your full 34" of your ribbon.

See this loop? It's been creased well, that is how this bow will take it's shape.

Leave a tail of 3-4" and make a 3" loop, bring your longer tail towards you and fold it under like so to form a loop.

Bring your ribbon back up again to form another loop!

Keep on going back and forth until you have 6 loops, 3 on either side hold it tight in the middle and wrap your wire around the center several times to make sure that it is good and secure. Put your basic pageant bow aside for a moment.

Go back to your bow and take 2 clippies, double or single pronged makes no difference and clip your tails together, spray them with some fabric stiffener so that they will hold closer together. Put aside and go back to your basic pageant bow while that dries.

Take your tails of your basic pageant bow and cut them on an angle. The tails on this bow are longer for this version because we want the tails to show up underneath our layered bows. When you make this bow normally your tails will be a little bit shorter. One of my favorite designs that I made because you can do so much with it as far as layering for funky bows! It is also beautiful all onto itself.

Your bow should be dry now. Attach your basic pageant bow on top of it, wire it well and place your take your 2 - 5" pieces of turquoise grosgrain ribbon, cut both ends of the ribbon on a V angle and tie your 4" piece of blue satin ribbon cut on angle / on both

sides in the center of this bow, leave the excess ribbon tails. Now wire this on top as another layer and wire them well to the rest of your bow and you are all done with your Madeline bow! :) In making this Madeline bow you just learned how to make 3 BOWS woohoo! Simple bow tie bow, 3 piece bow tie bow that you can add all kinds of embellishments in the center and of course your basic Pageant bow! You are DOING great! :)
