

Korker Bow

Usually you will buy your korker ribbon in one long piece. Cut the strand into 2" or 3" intervals. You can make them as big or small as you want to. After your pieces are cut, arrange your korker ribbons in any color, print, style that you wish by stacking 8 korker ribbons on top of each other for a total of 4 layers. If you are using more than one color, style.

Next carefully clinch your korker ribbons in the center, keep a tight hold on them. Take a piece of wire, clear string or elastic band to tie them up.

Secure them with a covered clippie, pony o or elastic of your choice

Lazy Korker

This is so simple but so cute! Take 1 dozen korkers. You can add on more or less. The choice is yours! It doesn't matter if you didn't have them in perfect order because that is part of the design.

Clinch them in the middle and tie them up, secure them to a clippie.

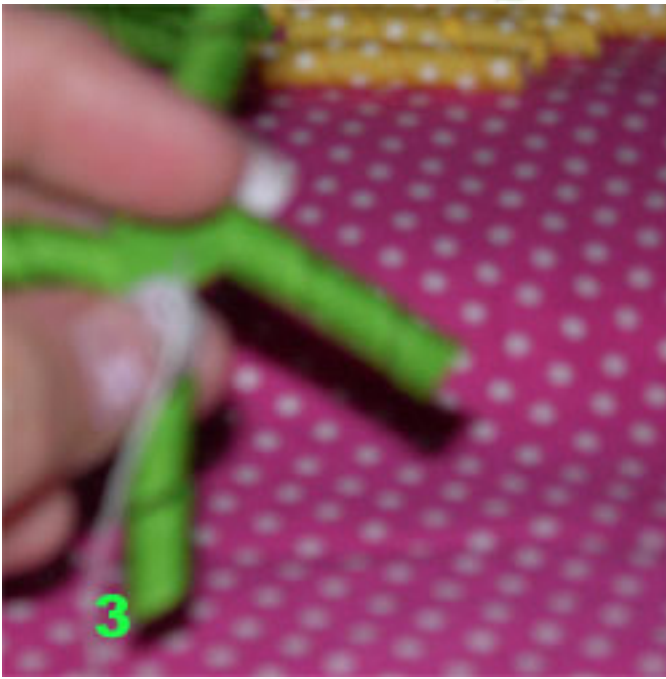

Triple Decker Korker

Another one of our designs, just love it

because you can actually layer the colors so it looks like a flower! This is sort of made like what some call a "Snowball Korker" in that you will need some thread, clear thread is best, and a needle. Don't worry, my method is fast and not time consuming at all like the old way of making a Snow Ball Korker! For a triple Decker korker you will need to choose 3 colors and 3 colors only of whichever color and or styles that you like, you can however mix up stripes and dots e.t.c. just as long it is of the same color. Cut any color of your korker ribbon in 3" lengths. Now cut another color/style of korker ribbon that you chose in 2" lengths. The next in 1" . You will need about 32 Korkers for a nice cute full korker, the more Korkers you use the fuller, fluffier your korker ribbon will be.

Now take your needle and thread and stick your needle through one korker in the center, pull through, put your needle through another korker of the same length and pull through.

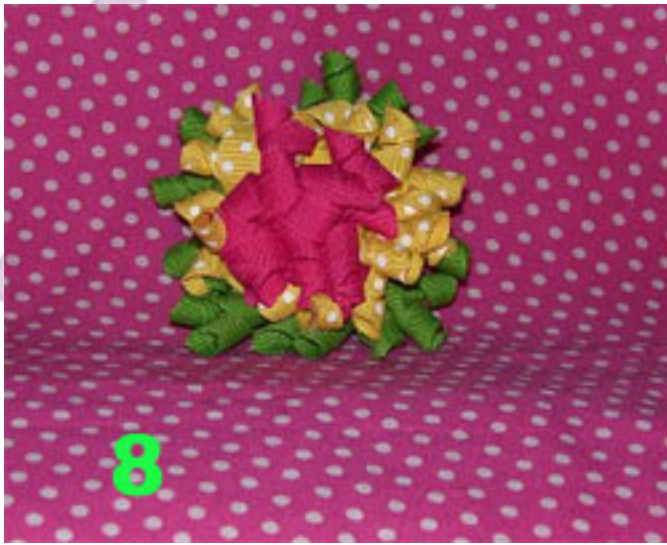

See the needle sticking up through the green pile of Korker ribbons? That is how you will add one more ribbons. Add on another

ribbon and move the ribbons around so that you are basically making a sort of criss cross design so that you will have a nice full circle effect with your korker ribbons. Have your needle sticking up through the ribbons like the above picture. Keep on going...

do not pull the needle through, just keep on adding one korker after the other until done. Repeat with your smaller korker ribbons now, your 2" Korkers. When done, repeat again with your 1" korker ribbon. Then pull through with your thread. When done just take your needle and sew down through the middle of your Korkers. You will see that your needle will pop out the other end, repeat. For it to be nice and secure tie a knot at the end and add it to a clippie or pony o. You are done! Cute huh!? :) hehe :)

Double Decker Korker

"Double Decker Korkers" are the same way , only thing is that you pick out 2 colors with each color and or style be in a certain length, example, yellow stripe 1", 2" apple green I've never made more then 3 layers, Experiment, you never know what you might come up with. :)

Snowball Korker

Just like a "Double Decker or Triple Decker Korker" in that you will need to sew, don't use the old method of threading through and

pulling out your needle and thread, you will be there all day! Just stick the needle through your korker and start piling your Korkers on your needle before you pull your threaded needle through. Mix up your Korker ribbons with some nice Krinkle ribbon. That's a Snowball korker. It's simple but cute.

Korker Pony O'

Simplest of them all! And soooo cute! You will need strands of korker ribbon that you have cut all one length and a pony o band. Now tie your pieces of korker ribbon onto the pony o band in the middle of the ribbon, nice and tight.

Keep on doing this until you have korker ribbons tied all over the band or you can add less whichever until you have reached you desired effect. These can be as fluffy and as funky as you want them to be! :)

Korker Ribbon Headband

Use a pre made head band, it is much easier this way, and it's not expensive at all if you get them at the right price! See our list of "Resources" where to get them on the cheap. The time that you would save in making this, you could have bought one already done. In my opinion.

Take your pre made head band, see the part of it where the headband came to an end where it is sewed? Take your korker ribbon or Lazy Korker with a clippie attached and *sew* it on with a few stitches. It wouldn't be a good idea to glue this on because remember this band

will be stretched and stretch. Might not hold up well if you glue on your Korker Ribbon. It's best to sew it on to make it nice and secure.
