

Kitty Cat Bow or Leopard Bow

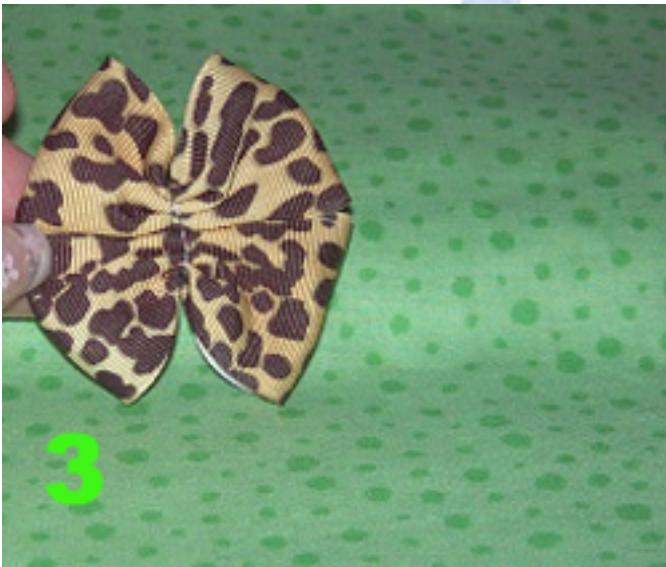

This is the same face that you will be using to make a Kitty Cat, in your choice of colors of course. Right now I am showing you how to make it in a Leopard ribbon so that you can see how versatile this face can be.

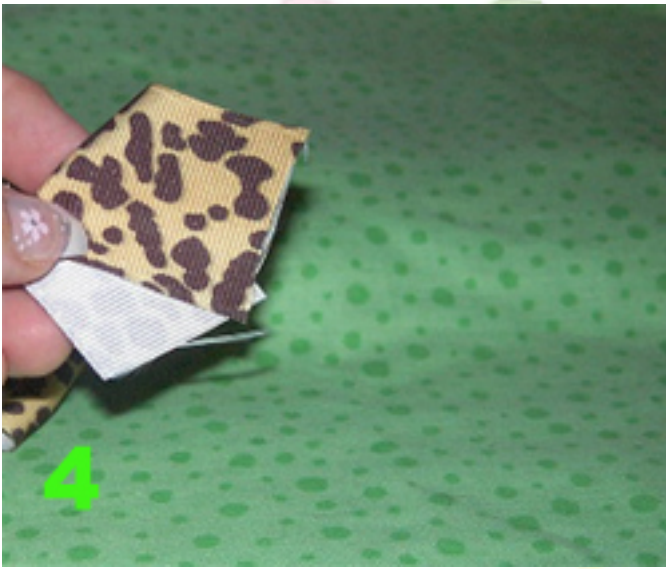

Use 1.5" leopard ribbon. Measure 2 pieces of 5" ribbon and 2 pieces of 3" ribbon for the leopards ears. Make two bows and clinch and secure the center with a piece of wire or elastic.

Attach both of the bows together by securing it with a piece of wire.

Time for your ears. Fold over your piece of ribbon so that it looks like a V shape but upside down. Glue it a little bit and repeat with your other piece of ribbon for the other ear.

go back to your first piece of ribbon and fold that upside down V in half like so. This way you will have a pointed top ear.

Glue on the back of the leopards face. Repeat with the other ear.

Give him a little black pom pom for a nose and a pipe cleaner that you have cut in 1 and 1/2". Glue the pipe cleaner on first then the nose on top of that. Give her some googly wiggle eyes.

A nice hair bow on the top of her head. And cut a piece of red grosgrain ribbon for her

tongue. Slip her tongue up inside her ribbon a little and glue in place.

There she is! Isn't she cute? :) You can make any Kitty Cat face that way! Just change the colors of the ribbons that you are using. :) You can also make her a boy Kitty Cat by giving her a Bow tie underneath her tongue!
