

Duckie Bow

Measure 2 pieces of 1.5" yellow grosgrain ribbon 8" each. Make a bow and clinch in the center and secure it with a piece of wire or elastic on each bow.

Measure and cut a piece of 4" ribbon.

Attach both of your bows together with a piece of wire or an elastic. Bend the top bows sides up more so that they are going upward.

Take your piece of ribbon crease and fold it over in 3rd's place it around the two bows that you just attached and glue it so that in the front of the Ducks face you will see a nice piece of ribbon all finished.

In this photo you see the baby duckies face that can be used for Pony o's, Piggies, e.t.c. The other Duckies face is the bases for the "big girls bow" duckies face. Now just add some korker ribbon for the hair curls or you can just

place a nice bigger bow on top of the duckies head. Add some eyes, make them close together. And for a mouth you will need the larger size double ruffle orange ribbon. Very simple to make the duckies mouth. Just fold over a piece of 4 inch ribbon and make a little tuck inside for his beak. Glue it on your double bows that you are using for your duckies face. Another alternative to this is using just grosgrain ribbon for the duckies beak. And you can even make a tiny korker bow and place it on top of the duckies head instead of a bow. For a Mr. Duckie just add a cute blue bow tie underneath the duckies beak :)
