

# Interchangeable Headbands

Buy a premade regular headband. Cut a piece of 3/8" ribbon apporx. 2", the same color as the headband would be best. Look at your headband, you will see a part of the headband that the sewing is noticeable that is where you want to sew on your piece of ribbon. Sew the ribbon on - on either end like a loop so that you have a way to slip your clippie through it. If you do this yourself it will take you 2 minutes tops and you save yourself a min. of 50cents then you would by buying a pre made interchangeable one yourself. 50 cents or 2 minutes?

After you do that make a bow of your choice. Line a clippie and secure the clippie onto the back of your bow. Now you can just clip your newly made bow plus any of your other bows onto this headband!

I didn't line my clippie as you can see in this picture, shhhhhhhh! Don't do that! LOL =X
