

Twirly Cheer Bow

I just love this Cheer bow, I wanted to come up with a design that was fun but yet neat and more elegant.

Materials Needed

2 pieces of 2.25" black grosgrain ribbon 11" long and 1 piece cut 8-9" long

Wire

1.5" red grosgrain ribbon, 2 pieces cut 8" long and 1 piece cut 11-12" long

Make 2 basic bow tie bows by folding over your ribbon with atleast 1/4" over lapping so that you can wire the center without the bow coming apart.

Glue one bow on top of the other in an X pattern, or wire them, your choice.

Take your 8-9" ribbon and cut the tails in the V shape on both ends.

Glue it to the back of the bow that you place in an X.

Make 2 red bows just like you did above, clinch the center and wire them well. Take your longer piece of red ribbon and wrap the piece of ribbon around one of your red bows and tie a knot in the center of the ribbon and pull your tails outward and cut on an angle on both ends. Glue your red bows on top of the black X bow that you made, attach to a french clip and there you have it!
