

## Tailored Bubbley Bow

This is a more tailored version of our Loopy Bubbley Bow, perfect for Church, Recital, Sunday School etc.

### Materials Needed

French Clip with bar removed, place it back when you are done making your bow.

Grosgrain or Satin Ribbon 1" wide. Cut two pieces the first piece your center loop 5", for the rest of your Bubbley bow cut one piece 14".

Wire

Glue

Take your smaller piece of ribbon and form a loop, glue the loop together

so it holds. Put aside for now.

Take your french clip and fold your ribbon in half so you can find your center of your ribbon, glue that ribbon top your french clip so that you have equal amounts of ribbon hanging on either side of your french clip.

Glue on top of the french clip and the ribbon that you just glued on your loop! Make sure that your loop is glued to the center of your ribbon.

Start on the right side of your french clip, gather up 1/2" of ribbon, fold over and wrap a piece of wire around the ribbon to hold it tight, make another 1/2" loop, wire, keep on going until you have like 2" of ribbon hanging, basically what you are doing is grabbing a 1/2" piece of your ribbon folding it and holding it secure with your wire. Cut the end into a tail like V cut.

Start on the other half of your ribbon doing the same thing, remember to wrap your ribbon as you go along.

Separate your loops with your fingers to fluff it up.
