

Looped Layering Bow

Materials needed:

Wire - 18-20 gauge

Clippie of your choice, French clippie is preferred for the stability of the bow

Hot melt glue or Aleene's Tacky Glue

Spray fabric stiffener

White tissue paper or Paper towels

These bows are PERFECT for layering one on top of another by just putting them on top of each other going in opposite directions! You can layer different colored and printed ribbons and adding an embellishment in the center if you so choose too. I love layering these and adding Korker ribbons or a little Korker bow in the center because whatever colors you used in your layers you can bring them out in your Korker bow!

11" of the size of ribbon of your choice.

Take your 23" - 1.5 rainbow striped ribbon make, leave a 1" tail and make a 4" loop, take your left tail and fold it away from you.

Clinch it in the center and secure it well by wrapping your wire around the center a few times. Cut OFF all of your tails because you will be layering these and you don't want them getting in the way of your design.
