

Mod Daisy!

This is one of my fav's! It's so funky and cute and you can make it in different sizes and it will still look as cute.

Materials Needed

3/8" Grosgrain ribbon in pink or the color of your choice cut into 4" to 4 1/2" pieces, you will be needing 20 pieces for your Mod Daisies Petals
Alenes Tacky glue, or any kind of a glue just not hot melt glue please it will ruin it!

Brown 1 1/2" ribbon cut 4" piece

Take a piece of your pink grosgrain 3/8" ribbon that you cut, fold in half so you can find the center of your ribbon and tie a knot, not too tight now because after you do that you want to position your knot to form a lil bit of a peek! You can do that easily by shifting your knot a lil bit.

See here in photo #2.

Take your piece of brown ribbon and put glue on one side, fold in half and smooth out, when it dries well it will harden a bit which is perfect, now cut it into a circle about 1 1/2" to 2" in diameter, if you are not too good at cutting out shapes that is just fine don't worry just get a cap from a large bottle of soda or bottled water, trace it and cut. :)

Take a piece of your pink ribbon that you made a knotted peek with and glue the ends of the bottom of the ribbon together, JUST the ends so that the flower petals will have a dimension to them and not be flat! Your centers will poof up which is what you want for this!

Now do that with all of your petals, knot the centers in a peek and glue the ends of the ribbons then glue your petals one by one on the back of the center of your circle.

Keep on going until you are done, adhere it to a clippie of your choice and that's it a Mod Funky Daisy! :) Pink and Brown are the hottest colors so is turquoise and brown! TIP to keep up with the latest colors it's best to keep a good eye on what Gymboree makes they are trendsetters and one of the biggest favorites for children besides Baby Lulu and Oilily!
