

Top and Bottom tailed Bow

Materials needed:

Wire - 18-20 gauge

Clippie of your choice, French clippie is preferred for the stability of the bow

Spray fabric stiffener

White tissue paper or Paper towels

Ribbons to Measure and cut (your ribbons of choice)

1.5" grosgrain ribbon 35" long

Pictured are labeled numbers 2-5

Use your 1.5" emerald green grosgrain ribbon 35" long. Leave a little bit of the ribbon tail approximately 3" hanging then form a 6 inch loop then bring the ribbon back towards you and form another 6" loop. Take your ribbon

and pull it away from you to form another 6" loop. Take your ribbon and again pull it towards you. You are basically taking ribbon, making a loop folding the ribbon under, forming another loop, pulling the ribbon away from you and repeating these steps over again like a zig zag pattern. *Z*

See picture 4 nice and funky loose loops, clinch it in the center, wire it tightly.

Cut both of your tails on an angle V shape. You just made a Big *Top and bottom tailed bow*! This bow is so versatile, you can do so much with it!
